# FRATELLI PEZZA

*Total reliability since 1970*

Fratelli Pezza s.r.l. was founded in 1970 and the owner, Alessandro Pezza, still represents its creative heart.

The company specializes in the production of **sandblasting and marking machines for flat glass**, of which it is the undisputed market leader.

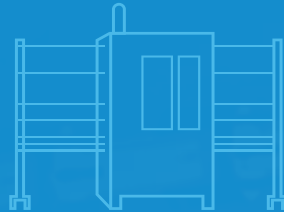

The catalog includes the automatic sandblasting cabins of the **Zephir** series, simple and economical, and the **Mistral EV** series, which is top of the range equipment. The offer is completed by the automatic marking devices of the **Easymarker** line, which can be combined with both vertical and horizontal glass processing machines.

## *Made in Italy*

Fratelli Pezza manufactures its products in its large and recently renovated headquarters in Clusone, in the province of Bergamo, and takes advantage of a dense international distribution network.

# GHIB

*Sandblasting has*

*never been so easy!*

**GHIBLI MANUAL SANDBLASTERS ARE THE PERFECT SOLUTION TO EXPRESS YOUR CREATIVITY !**

They are sturdy and compact machines with small overall dimensions, as well as easy to use by any operator.

They are characterized by high productivity and low consumption of electricity and compressed air.

It is possible to operate manually and the maximum working height can be doubled thanks to the fact that the cabin is open topped.

# GHIBLI

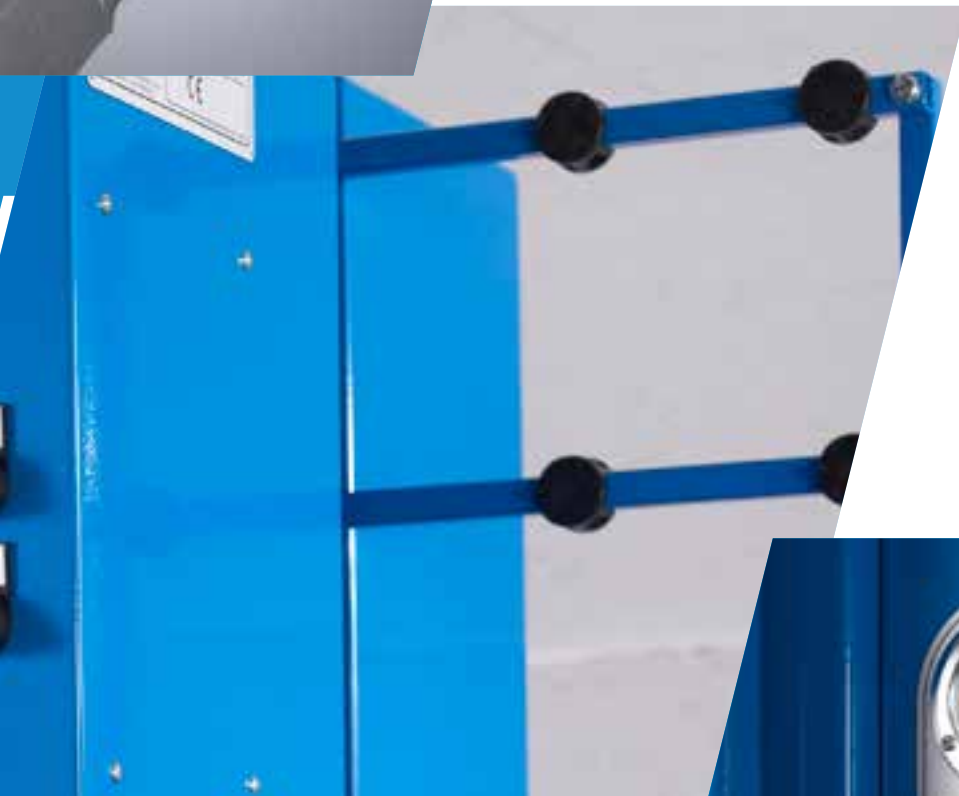

*Simple and high-performing!*

Our sandblasters are equipped with a high efficiency filtration system with automatic recovery and recycling of the abrasive material and separation of waste dust.

The rubber protections ensure airtight seal, preventing the dust from escaping into the surrounding environment.

All components and wear parts are made of highly abrasion resistant materials to ensure long life.

## OPERATION

Activation of the sand jet via a pedal to carry out the desired processing.

# GHIBLI

## FEATURES

- > Space-saving
- > 1 manual gun
- > Manual sandblasting
- > Foot-pedal controlled
- > Built-in filter system
- > Automatic recycling of the abrasive material
- > Dust-proof rubber protections
- > Anti-scratch bristled rings
- > Nylon rollers for the manual movement of the glass plate

## CONSUMPTION

- > Low consumption (1,2 kW - 500 l/min)

## WORKING FEATURES

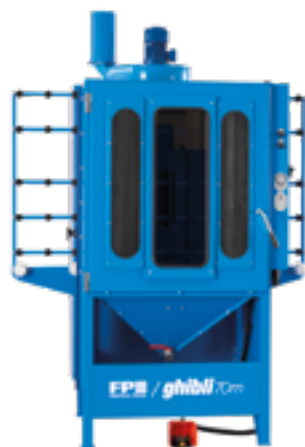

- > Normal sandblasting
- > Deep engraved sandblasting
- > Glass thickness up to 50 mm
- > Manual processing up to 1200 mm height
- > Open top for processing big glasses

## OPTIONALS

- > Turntable
- > Inclinable platform

70

### *Small unit - high performance*

- > Processing up to 860 mm height
- > Total electrical consumption 1,2 kW

140

### *Creativity at work*

- > Processing up to 1200 mm height
- > Total electrical consumption 1,2 kW

# GHIBLI ACCESSORIES

## INCLINABLE PLATFORM

THE IDEAL SOLUTION FOR  
BLASTING SHAPED ITEMS

Platform, that can be mounted  
inside the cabin, on which to place  
shaped objects (vases, sculptures,  
plates, glasses, etc.).

## TURNTABLE

In combination with  
the inclinable platform,  
it's possible to use a  
turntable which makes  
the manual sandblasting  
process easier.

## ORIGINAL SPARE PARTS

FRATELLI PEZZA has immediate  
availability ex-stock of all consumables,  
from nozzles to technical spare parts.  
FRATELLI PEZZA recommends to only  
use original spare parts to safeguard  
proper operation of the machine and  
preservethe validity of the warranty.
